Hiring Manager  
Goldman Sachs  
77 King St W  
Toronto, ON M5K 2A1

Dear Hiring Manager,

The prospect of blending advanced machine learning techniques with financial engineering at Goldman Sachs is electrifying. The MLOps Engineer position aligns closely with my career aspirations and skill set, offering the perfect platform for impactful contributions and professional growth.

I am an MSc in Applied Computing candidate at the University of Toronto and a Robotics Software Intern at Kindred AI. My experience in machine learning and Unix-based systems makes me excited about the immense value I can bring to Goldman Sachs' Data Science and Machine Learning Platform team.

I appreciate Goldman Sachs' innovative approach to technology and finance. The dynamic environment at Goldman Sachs that fuses machine learning with financial engineering is particularly exciting for me. I understand the challenges posed by today's volatile market and rapidly evolving machine learning frameworks. My projects involving a variety of deep learning models and running diffusion models on edge devices have equipped me with the experience to address these challenges effectively.

Thank you for considering my application. I look forward to the possibility of further discussing my fit for this exciting opportunity.

Sincerely,

*John Doe*
